2012 50 years and counting

My first Tall Bearded irises were purchased and planted in 1962, just before my 11th birthday. It was also the unforgettable year that Mom and Dad could finally afford an indoor bathroom. (Warm toilet seats and a real bathtub was luxury beyond imagination!) With the lone exception of 1971, new iris varieties have been added every year since. Extra effort is exerted here to insure you of quality plants. Generous bonuses is our long-established reputation.

Printing accurate descriptions of each variety is expensive and it is pleasing to hear that you keep our catalogs as iris reference tools. Karen has learned to use "In Design" software from scratch this winter and her re-formatting of the catalog was required to accommodate the expanded listings. Your response and feedback would be appreciated.

This year's edition is divided into two sections. Section I covers the newest additions while Section II includes many older favorites, some of which will not be cataloged again. If there is something you really want, don't wait!

Craig, my oldest child, is due home from his private sector job in Afghanistan this summer. The lives of the two grandchildren (from daughters Bridget and Shannon) provide an interesting contrast to my simple farm childhood with no money, no vacations, simple toys and hand-me-down clothes. I am not convinced that this American version of "quality prosperity" has made our lives simpler or more rewarding.

Iris hybridizers are salt-of-the-earth individuals who love spreading pollen and digging in the earth. These brave souls (*my heros!*) receive scant financial rewards but are thrilled beyond measure when you plant one of their creations. I remain on the prowl for new Tall Bearded creations from undiscovered pollen daubers.

Generous bonus/gift plants are happily provided to our customers in spite of ever-spiraling shipping costs. (We do use re-cycled shipping cartons.) Every variety is guaranteed to be properly labeled by variety name; Tennessee Dept. of Agriculture inspection assures that you will receive plants that are insect, pest and disease free.

Your patronage is appreciated. Email remains the most efficient method for contact with questions or comments. We try to reply within 24 hours except during peak bloom. Have a wonderful bloom season!

With sincere thanks to each of you,

--Phil Williams

2012 IRIS INTRODUCTIONS

Pictured on Front Cover

This year's releases may prove to be the most diverse yet offered for your consideration! Each and every one loves to grow and they will delight you with their performance in your own garden. Their parentage indicates diverse bloodlines; their quality in all parts reflect the individual hybridizer's commitment in selecting only the best for introduction. They were created in widely-varied North-American climates--Washington, Arizona and Missouri--and they love growing in central Tennessee. Their bloom season extends from very early to late. Enjoy!

BRANSON BLUES (Barbara Nicodemus) TB, 36", M-L. If you could take a peek down into the standards, you just might think the petals are doubled! It is all the result of the ruffling of the standards and the wide, amazingly-formed style arms. The entire flower is the most refreshing, clear blue-white reminding me of the foamy, cresting waves billowing and surging to shore. The standards are classically domed and gently touching; the falls are wide and gently ruffled, held in position by amazing inner substance. Matching beards turn to yellow-tangerine deep in the throat. Strong stalks with good branching and 7 buds. **Seedling #J6A:** (Fogbound X #G46-1 (Sea Power x SierraGrande).....\$45.00

JAZZ PIZZAZZ (Calvin Helsley) TB, 34", EM-M. In all these years growing irises I have never had an orange iris of such intense color, consistently good flower form, solid growth habits and garden performance. Calvin's photo seems a bit over-exposed as here it is a full, intense, bright orange throughout. The soft orange standards have a pronounced pink flush up the midribs; orange style arms are also tinted pink. Wide, flaring, beautifully ruffled falls have bright red-orange beards. This giant step forward in the orange color class offers consistent growth and performance, is disease-free here and its vivid flowers are sweetly fragrant. Calvin's best! **Seedling # 04-04:** Viva Mexico X Good Show \$45.00

HURRICANE BAY (Barbara Nicodemus) TB, 34", EM-L. Beautifully formed and ruffled flowers have pure, vivid purple standards; matching style arms have 1/4" charcoal-black edges around the crests. Wide and very deep, intense black-purple falls have a few purple striations around the charcoal- black beards with hairs tipped pale yellow, becoming tangerine deep in the throat. Extremely heavy substance; strong stalks with 7-9 buds. **Seedling # J24A:** Ghost Train X Starring \$45.00

HARMONIOUS FLOW (Barbara Nicodemus) TB, 33", EM-M. Lightly ruffled flowers have bright red-violet standards and style arms. Falls are deep, intense, rich, velvety blackish red-violet (the color of pickled red beets!) with slight red-violet edging that matches the standards. There are a few violet markings along both sides of the red-violet beards that are heavily tipped golden-bronze. Nicely-branched stalks have 7-8 buds consistently. **Seedling # L3A :** Ozark Rebounder X Starring \$45.00

UNBRIDLED BEAUTY (Barbara Nicodemus) TB, 34", EML. You keep asking for "more lacy irises" from Barbara and she has delivered! This is more violet than her previous laced beauties. The color is purest, clean, magnificent orchid. The standards are crisply held and the wide, flaring, gracefully ruffled falls are edged in beautiful lace! The beards have orchid bases, palest yellow at tips, that gradually deepen to golden orange in the throat. Strong, beautifully-branched stalks consistently have 7-8 buds. **Seedling # J41A:** (Holly Golightly x Feather Boa) X #D2-26 (Recherche x Feature Attraction).....\$45.00

DEMONIC (Gerald Richardson) TB, 39", M. This is a deep, sooty garnet-purple flower that is technically a bi-tone; Gerald also accurately describes it as "slightly lighter on the fringes". The large, rounded ruffled, delightfully formed flowers are not properly flattered by our photo of a newly opened flower. The stalks have 2 branches, 1 to 2 spur(s), and it remained in bloom here last year for over two weeks in soggy, pouring rain. Its lush growth, strong stalks and insistent performance here in Tennessee was most impressive for this color class. A sib to 'Blueberry Fudge'. **Seedling #03-2-4:**\$45.00

ROYAL SLIPPERS (Margie Valenzuela) TB, 37, VE-E. Rich mulberry-purple standards lighten at midribs; purple red style arms. Snowy white falls are widely edged purple with the shoulders and areas around the beards having deep maroon-purple veins and plicata markings. There is a sparsely dotted purple center line just below the beards that are orange in the throat, mustard-yellow in the middle and lavender at the ends. An easy grower with wide foliage, great branching and 9 buds. Recipient of the A.I.S. Exhibition Certificate at the Tucson spring show. **Seedling # 034-1M:** Select Circle X Snowbrook\$45.00

PINKABLUE (Gerald Richardson) TB, 32", M. A real show-off here! This is an intense, full, cool pink self with a hint of blue that produces a deeper rose-pink-mauve infusion in the midribs of the standards. The very wide hafts touch and the ruffled and rounded broad falls are a bit lighter with deeper rims and light lace; rose-tangerine beards. The vigorous plants are covered in masses of blooms thanks to branched and budded stalks. The color reminds me of the famous Rudolph blue-toned pinks of times past. **Seedling # 03-20-1:** Fogbound X Spring Social \$45.00

STRING OF PEARLS (Gerald Richardson) TB, 36",M. Here is another lacy beauty for your garden! This yummy pastel blend of lavender, ivory and pink is refined by more intensely-colored veining in the full lavender-blended falls; ivory beards are tipped light orange. Wide, round, flaring flowers are hosted by strong stalks with 2 branches, 2 spurs and 7 buds per stalk. The plants are very strong with very wide and husky foliage. **Seedling # 03-15-1:** Vienna Waltz X Feature Attraction\$45.00

CARRARA CLOUD (Ben Johnson) TB, 32", M. Not just another white, this is actually a pastel dark top/reverse amoena color pattern. The ruffled, erect white standards are infused blue and blue-violet, deepest along the midribs. The coloration is more intense in cloudy/rainy! seasons, but even in warm, sunny ones these blue and violet tints rise up from the base of the standards, swirling and diffusing into the white petals like a hazy blue mist. The standards sit atop wide, touching, ruffled white falls that have blue-tipped yellow beards, reminding one of shafts of sunlight piercing a thundercloud. Strong stalks are well branched with good bud count creating a mass of bloom. **Seedling # I-4-B:** Heartstring Strummer X Society Page..... \$45.00
